

Trade Futures 2027

In the Pathways to Trades program, students participate in a wide range of activities designed to develop basic knowledge and skills in the building and construction trade areas. They also develop skills to work safely on building and manufacturing sites.

Students become familiar with a wide range of tools and equipment, work in a simulated work environment and participate in work placement on building sites.

This course is an introduction for Year 10 and Year 11 students to the different VET options they may want to follow in the future such as:

- Timber Construction and Plumbing
- Cabinet Making
- Electrical
- Welding and Fabrication

Course Modules Outline:

- White Card (2 weeks)
- Construction & Plumbing (10 weeks)
- Cabinet Making (5 weeks)
- Welding and Fabrication (6 weeks)
- CITB carry out measurements & calculation (2 weeks)
- Basic Levelling (2 weeks)
- Landscaping (2 weeks)
- Painting (2 weeks)
- Being ready for the world of work (5 weeks)
- Work Experience (2 weeks)

This course is assessed as SACE Stage 1 Integrated Learning (20 credits). This course is designed so that students who may wish to follow a trade pathway can move to a Certificate 2 course in their chosen field by assisting them in the VETRO process for 2028. It will also provide students with the skills required for SACE Stage 1 Material Solutions (metal/timber).

Students are interviewed as part of the selection process for this course.
