

The Artistic World 2027

The Seaton High School Artistic World Entrepreneurial Endeavour program is offered in collaboration with media industry producers and education providers.

Students will use and further develop a range of skills and knowledge from dance, drama, media, music and/or visual art to solve a real-world problem and apply it to an area of social need. There is a focus on the integration of arts to create digital media, such as entertainment, games, news, podcasts and/or social media.

Students will apply their understanding of digital media to create texts using journalism, photography, graphic design, film/video, animation and performance. They will make connections with media industries and develop skills in media technologies, such as podcasts, SLR cameras, digital effects/animation, and video production and editing. Through this endeavour, students will continue to develop the habits required to be successful, confident and entrepreneurial learners.

Key Learning

- Media literacy & skills development
- Innovative use of technology
- Critical & creative thinking
- Performance development
- Collaborative skills
